About Your Surf Fishing Permit

- For more information and updates regarding Surf Fishing Permits, visit destateparks.com/Fishing/SurfFishing
- Surf fishing vehicle permits are issued for the calendar year. They allow vehicles to access designated beaches at Cape Henlopen, Delaware Seashore and Fenwick Island state parks and Beach Plum Island Nature Preserve for the sole purpose of surf fishing.
- A surf fishing permit is valid only for two-axle vehicles that are licensed and registered to operate on public highways.
- The surf fishing vehicle plate and current sticker must be properly displayed on the vehicle for which the permit was issued and shall be affixed prior to operation on the beach.

- Operating a vehicle without a current surf fishing vehicle permit and plate on state park beach areas or dune crossings is prohibited.
- Driving on swimming and surfing beaches during summer season day-use hours is not permitted. The permit does not give the right to access other state or private beaches not owned or administered by the Division of Parks and Recreation.
- The owner's copy of the permit receipt shall be available for inspection at all times when the vehicle is being operated on beach areas.
- Loaning a surf fishing vehicle permit or plate, or using or attempting to use a surf fishing vehicle permit or plate on any vehicle other than the one it was assigned to is prohibited. In addition to other actions that may be taken, the permit and plate will be confiscated and held as evidence.

Driving on State Park Beaches

- Surf Fishing permits may have additional restrictions that limit access and/or require reservations during peak times.
- Vehicle use on the designated beaches is restricted to persons actively engaged in surf fishing. Operation of a permitted surf fishing vehicle on the beaches administered by the Division for reasons other than traveling to and from fishing areas for the express purpose of surf fishing is prohibited.
- "Actively engaged in surf fishing" means a person is taking all reasonable and necessary actions to maximize the probability of hooking and landing game fish by rod, reel and line attached to a baited rig, artificial lure or artificial fly. Persons are also actively engaged in surf fishing when they are within 50 feet of their fishing equipment and are tending, casting and recasting their fishing equipment.
- Any permitted surf fishing vehicle parked for any period of time on state park beaches without one or more persons who arrived in that vehicle being actively engaged in surf fishing is prohibited.
- The use or operation of any vehicle whatsoever on, over, or across state park sand dunes is expressly prohibited, except when displaying a valid Delaware surf fishing vehicle permit and crossing dunes at authorized dune crossings, which are designated and maintained for that purpose.
- No vehicle shall be driven through, over or upon any beach area that has been posted as an endangered and/or protected species bird-nesting area.
- Prior to driving onto Delaware's state park beaches, ALL surf fishing permit holders are required to watch the DNREC Division of Parks and Recreation Surf Fishing instructional video at destateparks.com/Fishing/SurfFishing

Surf Fishing Safety

- Surf fishing vehicles must be equipped with a shovel, jack, tow rope or chain, board or similar support for the jack, and a low pressure tire gauge when being operated on state park beaches.
- Operating any vehicle on any authorized dune crossing or on any beach area at any speed that is greater than is reasonable and prudent under the conditions is prohibited. Vehicles must be operated with regard to existing and potential hazards, but never exceeding 15 m.p.h. In every event, speed shall be controlled and limited to that speed necessary to maintain traction and steering.
- The Division of Parks and Recreation shall have the right to suspend surf fishing vehicle permits for up to 90 days or to revoke permits for up to three years for conviction of reckless operation of a surf fishing vehicle under the influence of alcoholic beverages and/or drugs, or for violations of these regulations.

Violations and Fines

- Violation of the rules and regulations may result in a fine of \$50 to \$250 for a first offense and \$100 to \$500 for a second offense. Violators will be cited and permits may be revoked if state park regulations are not followed.

Other Important Information

- The use of mechanically-propelled bait or line casters is prohibited on all surf fishing beaches.
- Dogs are allowed in all surf fishing vehicle areas, but must be under control and on a leash not to exceed six feet in length.
- In addition to giving access to designated beach areas, the surf fishing permit also allows free entry to day areas in most Delaware State Parks.

Other Important Information

- The Carry-In, Carry-Out program is in effect in all surf fishing areas. Trash receptacles are not provided, remove all of your trash and dispose of fishing line properly.
- The surf fishing vehicle permit serves as the vehicle operator's fishing license when fishing in designated Delaware State Park surf fishing areas. In addition, the vehicle operator is required to obtain a free Fishermen's Information Network (FIN) number annually. All other anglers (unless license exempt) must obtain a valid fishing license issued by the Delaware Division of Fish & Wildlife which includes a free FIN number. License exempt anglers age 16 and older must obtain an annual FIN number to fish in Delaware waters. FIN numbers are available at de.gov/epermitting or at a state licensing agent, free of charge.
- Surf fishing areas are subject to closure at any time in the event of weather conditions (high tides, coastal storms, etc.). Surf fishing vehicle areas may be limited or closed when such action is deemed necessary for property management, protection of flora, fauna and their habitats, or when it is in the best interest of the health, safety, and general welfare of visitors.
- In order to protect fragile plants and grasses that stabilize the dunes, and to leave nesting or fledging shorebirds undisturbed, people, pets and vehicles are not allowed on the dunes or in bird-nesting areas. Only designated crossings may be used to cross the dunes. Violations are subject to fines.

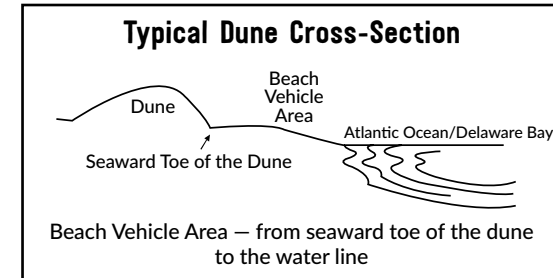

- Designated surf fishing beaches are open for other recreational activities. Caution must be exercised when sharing the beach.
- The beach ecosystem is very important and must be protected. Any damage done to the dunes should be reported to the nearest park employee.

Beach Access

Dune Crossings

Dunes are a fragile resource that provide important habitat for a host of plants and animals, and protect the coastline during severe storms. While dunes and the plants and animals found there usually survive storms, they are easily damaged by the harmful impact of pedestrian and vehicular traffic. The dunes are protected by law, and access across is strictly limited to designated crossings. Use of the beach is strictly limited to the seaward toe of the dune down to the high tide line.

Bird-Nesting Areas

When nesting is identified along beaches, areas may be closed to all traffic, including vehicles, pedestrians and pets.

For additional information on official state park regulations please visit regulations.delaware.gov/AdminCode/title7/9000 Permit regulations are strictly enforced.
